

CIVIL ENGINEERING SUMMER INTERNSHIP

Summit Geoengineering Services, Inc. (SGS) is an engineering consulting firm with an office in Farmingdale, Maine. We provide a wide variety of civil engineering services including, geotechnical engineering, foundation designs, temporary excavation designs (excavation and dewatering plans, including sheeting and shoring), and retaining wall analyses and designs. SGS owns and operates exploration equipment including drill rigs capable of both conventional and cone penetration testing (CPT) explorations and has a full-service geotechnical testing laboratory.

We are seeking a civil engineering student for a summer internship. The selected candidate will be working at our Farmingdale, Maine office. Responsibilities will include geotechnical fieldwork, laboratory testing, engineering evaluations and analyses, preparation of reports, designs, and preparation of engineering documents. The internship will include travel, primarily in Maine, to perform various fieldwork and inspection tasks. Applicants must hold a valid driver's license and have reliable transportation.

Applicants shall have completed Sophomore level Civil Engineering Classes. Upper-level undergraduates and graduate students are encouraged to apply. The wage for this position is \$22 to \$25 per hour (depending on qualifications) with mileage for business travel reimbursed at the current Federal Standard Mileage Rate. SGS will either provide or reimburse for cell phone and laptop use.

Interested applicants should send a cover letter and resume to bpeterlein@summitgeoeng.com.
