

SUMMIT GEOENGINEERING SERVICES

Overview

Summit Geoengineering Services, Inc. (SGS) is a Maine based consulting firm founded on providing clients with responsive and professional geotechnical consulting. Our consulting services are supported with our in-house subsurface exploration capabilities and soils laboratory testing. At SGS, our strength is providing our clients with highly qualified professionals who are committed to personally work with the client from the project start to finish. This personal commitment ensures our engineers obtain comprehensive project knowledge, permits straightforward communication, and demonstrates our commitment to making your project our top priority.
