

## **ENTRY-LEVEL CIVIL ENGINEER**

Summit Geoengineering Services, Inc (SGS) has an opening for an **Entry-Level Civil Engineer** to join their team in Farmingdale, ME. SGS is a Maine based engineering consulting firm. At SGS, engineers will immediately have access to expedited growth opportunity, mentorship and a network of professional groups offering programs for career development. The collaborative environment at SGS is one of the main ingredients to their success.

This position is considered junior/entry level and no previous professional experience is required. The ideal candidate will have a background in studying civil engineering with specific interest in geotechnical and geo-structural engineering. Project assignments and level of responsibility will allow you to grow professionally, rather quickly. You will be mentored by seasoned professionals, who will look to you to share technical knowledge and ideas.

### **Responsibilities include:**

- As a Civil Engineer, you will work on a variety of projects:
- Your project assignments and level of responsibility will allow you to grow professionally.
- You will be mentored by seasoned professionals, who will look to you to collaborate on technical knowledge and ideas.
- Starting Tasks will include:
  - Planning subsurface explorations and preparing cost estimates and proposals.
  - Performing field tasks using our in-house explorations services equipment and team, including subsurface explorations (test borings and Cone Penetration Testing) logging of test borings and test pits, and oversight of deep and shallow foundation installation.
  - Evaluating field data and performing engineering analyses/calculations.
  - Performing engineering designs and preparing construction documents for design-build projects.
  - Writing draft field and engineering reports and preparing construction drawings and other technical documents.
  - Performing laboratory testing as needed.
  - Communicating effectively and efficiently with contractors, clients, and team members
- This position includes a combination of field work and office work.

### **Job Qualifications include:**

- Bachelor's Degree in Civil Engineering
- A focus on or an interest in Geotechnical Engineering
- An interest in or actively obtaining an EI Certification is preferred
- Must be willing to live in Maine, work in our Farmingdale office, travel locally (Maine) and regionally (New England), and possess reliable transportation and a valid driver's license in good standing to access job sites.
- Must be willing to do fieldwork outside in all four seasons (typically 1-3 days per week)
- Effective oral and written communication skills.
- Strong attention to detail with good analytical and judgment capabilities.
- Ability to effectively work independently and in a team environment with a multi-discipline design team.
- Be physically fit
- High proficiency with MS Office Suite and Adobe.
- Must possess permanent authorization to work in the United States.

## **About Us:**

Summit Geoengineering Services is a Maine based consulting firm founded on providing clients with responsive and professional geotechnical consulting and contributing to a successful project through our technical knowledge and expertise in soils and foundation engineering. We have a close-knit atmosphere with 10 full-time employees, which enables us to provide our clients with highly qualified professionals who are committed to work personally with the client from the project start to finish. This personal commitment ensures our engineers obtain comprehensive project knowledge, permits straightforward communication, and demonstrates our commitment to making each project a top priority.

Our office in Farmingdale is nestled in central Maine within an easy drive to the beautiful mountains, lakes, cities and ocean Maine has to offer. We have several company activities each year, including an annual lobster bake/barbeque each summer and year-end holiday dinner each winter. SGS encourages its employees to be active in professional groups such as ASCE and offers an educational compensation program for working towards a master's degree.

Summit Geoengineering Services (SGS) was formed in 2010 to furnish clients in the northeast with a wide range of geotechnical engineering services. The co-owners, Bill Peterlein, P.E. and Craig Coolidge, P.E. bring over 60 years of combined experience to the civil engineering industry. Above all, the SGS professionals recognize that we are a service company and our success is wholly dependent on the quality of our services. SGS employees are selected based on their technical knowledge, communication skills, and ability and willingness to serve others. We firmly believe that this is the key to our success.
