

DRILLING ASSISTANT TECHNICIAN / MECHANIC

Summit Geoengineering Services, Inc. (SGS) is seeking a full-time (M-F) **Drilling Assistant Technician / Mechanic** for our exploration operations based at 64 Augusta Road, Washington, Maine 04574. We are interested in candidates who are hard-working, physically capable, committed, safety conscious, mechanically inclined, and team oriented.

SGS provides an exciting and challenging work environment fostering a culture that is collaborative, team focused, respectful, transparent and committed.

Job Details

- **Salary range: \$28.00 - \$35.00/hour – based on experience**
- Assisting SGS Drillers in field operations.
- Learning drilling methodologies for test borings and excavation of test pits.
- Projects are largely in Maine with infrequent trips within New England, including occasional company paid over-night stays required.
- Assisting Mechanic Manager with repairs and maintenance on all SGS commercial fleet of trucks, drill rigs, and excavators including inspections and potential rebuilds.
- Predominately year-round outdoor work, active, and dynamic.
- Monitoring a safe workplace, maintaining workplace safety and applying risk management processes for elimination of work-related injuries, damage to equipment, and incident-related lost time.

Qualifications

- Own or ability to obtain CDL Class A License
- Prefer experience in heavy equipment operations including: drilling, diesel, and mechanic skills
- Welding skills a plus
- Completed (or willing to complete): OSHA Construction 10-hour safety training and OSHA HAZWOPER 40-hour safety training
- Self-motivated to learn new skills for advancement
- Work well with a team (driller and engineer)
- Willingness to travel within Maine and occasionally New England
- Reliable to handle a variable daily schedule and range of outdoor work environments
- Mechanical aptitude and problem-solving abilities are important
- Be physically fit – able to lift 60 lbs. repeatedly, work in all weather conditions, work in a bent or crouched position
- Expected 35 – 55 hours per week, averaging 45 hours per week

Mailing: PO Box 515, Gardiner, ME 04345

Office: 210 Maine Avenue, Farmingdale, ME 04344

About Us:

Summit Geoengineering Services (SGS) is a Maine based consulting firm founded on providing clients with responsive and professional geotechnical consulting and contributing to a successful project through our technical knowledge and expertise in soils and foundation engineering. We have a close-knit atmosphere with 10+ full-time employees, which enables us to provide our clients with highly qualified professionals who are committed to work personally with the client from the project start to finish. This personal commitment ensures our staff obtain comprehensive project knowledge, permits straightforward communication, and demonstrates our commitment to making each project a top priority.

Our office is in Gardiner/Farmingdale and our shop is in Washington Maine. Nestled in central Maine within an easy drive to the beautiful mountains, lakes, cities and ocean Maine has to offer. We have several company activities each year, including an annual lobster bake/barbecue each summer and year-end holiday dinner each winter. SGS offers an educational compensation program.

SGS was formed in 2010 to furnish clients in the northeast with a wide range of geotechnical engineering services. The co-owners, Bill Peterlein, P.E., Craig Coolidge, P.E., and Lisa Turner, P.E., bring over 75 years of combined experience to the civil engineering industry. Above all, the SGS professionals recognize that we are a service company, and our success is wholly dependent on the quality of our services. SGS employees are selected based on their technical knowledge, communication skills, and ability and willingness to serve others. We firmly believe that this is the key to our success.
